RE: Corporate Adventures

Dear Patrick:

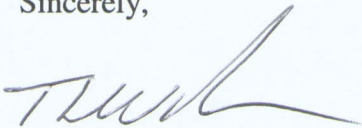

On behalf of the Leadership group that attended your two day training experience I want to thank you for a very professional and highly effective session. I have heard nothing but positive responses from those who attended and that is very significant because not all went with an enthusiastic attitude.

The group greatly enjoyed the DISC training and in some there is actual visible change. Their approach to problem solving and working with others has greatly improved as has performance of their specific function.

We discussed what areas we wanted to stress and you did an excellent job of addressing those issues. It is obvious by the actions of those who attended.

We are looking forward to further training of the Leadership group as well as the possibility of even more employees.

Sincerely,

Terry Wilber  
Plant Manager
